PROFESSIONAL SUMMARY

Software Engineering graduate with hands-on experience building full-stack, backend, web, and desktop applications using Java, TypeScript, React, Next.js, Python, Go, and Rust. Experienced in REST API development, relational databases, authentication, asynchronous processing, testing, deployment, and Git-based development. Built independent projects spanning banking, document processing, inventory/e-commerce, and developer tooling, with experience working across frontend, backend, database, and infrastructure layers.

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, Python, Go, Rust

Backend & APIs: Spring Boot, FastAPI, Go/Fiber, REST APIs, Spring Security, JPA/Hibernate, Jakarta Servlets, JSP/JSTL

Frontend: React, Next.js, Vite, HTML, CSS, Tailwind CSS

Databases: PostgreSQL, MySQL, SQLite, Redis, SQL

Software Engineering: Object-Oriented Programming, Data Structures & Algorithms, DBMS, API Design, Authentication & Authorization, Testing, Debugging

Tools & Platforms: Git, GitHub, Linux, Docker, Maven, Gradle, GitHub Actions, Vercel, Railway

PROJECTS

PDFNest / Platen | [Live](#) | [Project](#) | [GitHub](#) | Independent Full-Stack Web Project | 2026

Live document-processing platform for PDF editing, OCR, extraction, conversion, and advanced document workflows.

Technologies: Next.js, React, TypeScript, Go/Fiber, Python/FastAPI, PostgreSQL, Redis, Dramatiq, Cloudflare R2

- Built and maintained a full-stack web application using Next.js, React, and TypeScript with Go/Fiber REST APIs and Python/FastAPI services.
- Developed document-processing workflows for PDF editing, OCR, extraction, conversion, uploads, previews, and file processing.
- Designed API integrations and asynchronous background workflows for compute-intensive processing while keeping interactive web requests responsive.
- Deployed and troubleshooted services across Vercel and Railway, working across frontend, backend, databases, storage, testing, and infrastructure.

BankingSystem | [Project](#) | [GitHub](#) | Independent Full-Stack Project | 2025

Full-stack banking platform with a React web client, Spring Boot backend, database persistence, authentication, and identity-verification services.

Technologies: Java, Spring Boot, React, TypeScript, MySQL, JPA/Hibernate, Spring Security, Python/FastAPI

- Built Spring Boot REST APIs and a React/TypeScript client for customer, account, transaction, loan, and reporting workflows.
- Implemented application persistence using MySQL and JPA/Hibernate with structured service, repository, and API layers.
- Implemented JWT authentication and role-based access control with Spring Security.
- Developed a Python/FastAPI KYC service for ID OCR, face matching, liveness/anti-spoof detection, and identity verification using ONNX Runtime and OpenCV.

Runyard | [GitHub](#) | Independent Desktop Project | 2026

Local-first developer command center for discovering, organizing, inspecting, and safely running multi-service software projects.

Technologies: Tauri 2, Rust, React 19, TypeScript, SQLite

- Built project and service discovery for Node.js, Rust, Go, Python, Java, .NET, Docker Compose, and Make-based projects.
- Developed a React/TypeScript interface for managing projects, services, terminals, and run configurations.
- Implemented PTY-backed terminals, process lifecycle management, Git and IDE integrations, persistent configuration, and execution-trust controls.

EDUCATION

BEng in Software Engineering | IIC University of Technology | Java Institute Of Advanced Technology | 2021 - 2025

G.C.E. Advanced Level, Technology Stream | 2021

LEADERSHIP

Sergeant | National Cadet Corps | 2016 – 2020

- Led junior cadets and coordinated events, responsibilities, and team activities.

LANGUAGES

English, Sinhala
